Tweet

**Chris Krebs #Protect2020**

@CISARebs

...

To be crystal clear on , I'm specifically referring to the Hammer and Scorecard nonsense. It's just that - nonsense. This is not a real thing, don't fall for it and think 2x before you share. #Protect2020

**Chris Krebs #Protect2020**

@CISARebs · Nov 7, 2020

Seeing #disinfo that some isolated voting day issues are tied to some nefarious election hacking and vote manipulation operation. Don't fall for it and think twice before sharing! Check out Rumor Control for more info on the security safeguards built into elections. #Protect2020

[Show this thread](#)

Get the Facts: The systems and processes used by election officials to tabulate votes and certify official results are protected by various safeguards that help ensure the accuracy of election results. These safeguards include measures that help ensure tabulation systems function as intended, protect against malicious software, and enable the identification and correction of any irregularities.

Every state has voting system safeguards to ensure each ballot cast in the election can be correctly counted. State procedures often include testing and certification of voting systems, required auditable logs, and software checks, such as logic and accuracy tests, to ensure that ballots are properly counted before election results are made official. With these security measures, election officials can check to determine that devices are running the certified software and functioning properly.

Every state also has laws and processes to verify vote tallies before results are officially certified. State processes include robust chain-of-custody procedures, auditable logs, and canvass processes. The vast majority of votes cast in this election will be cast on paper ballots or using machines that produce a paper audit trail, which allow for tabulation audits to be conducted from the paper record in the event any issues emerge with the voting system software, audit logs, or tabulation. These canvass and certification procedures are also generally conducted in the public eye, as political party representatives and other observers are typically allowed to be present, to add an additional layer of verification.

I think you're pontificating to a room that isn't listening. What you're saying about the election being more secure than ever isn't bearing out in the facts —seems to be illustrative evidence, but proves nothing.

Credible people are speaking out about hammer and scorecard.

This claim about election fraud is disputed

So sad when the Deep state has you in their back pocket Chris Krebs. You just sold your soul to the devil.  
Vengeance is mine saith the Lord .  
You will be repaid for your lies and betrayal.
